High Resolution Eye Ball Dome Camera

Eyeball High Resolution Low Light Fixed Colour/Mono Dome Camera

Integral IR LED Illumination up to 10M
High Resolution - up to 700TVL
4 - 12 mm Varifocal Auto Iris Lens
(Horizontal viewing angle can be set between 22 & 60 degrees)
External or Internal Wall or Soffit Mount
Robust Aluminium Cast Housing
Internal or External Use

High Resolution Cameras can highlight problems that previously went unnoticed. For example a spherical dome can refract light around its structure and cause a slight haze across the image. The use of a flat glass prevents this from happening and accordingly provides consistently clearer images.
