# HD IMAGERY ON AN ANALOGUE PLATFORM

## Digital Video Recording

**GOOD QUALITY LIVE PICTURES DON'T ALWAYS MEAN GOOD QUALITY RECORDED IMAGES. HD960H RECORDERS WITH COMPATIBLE CAMERAS CAN PROVIDE SUPERB RECORDED IMAGE QUALITY COMPARABLE WITH THE LIVE IMAGES.**

**These images from the same camera on a system we installed were recorded and copied to DVD as they would be normally for evidence purposes. The still images below were taken from that DVD using our office PC.**

**THIS IMAGE WAS RECORDED IN DAYLIGHT IN THE RAIN USING A GOOD QUALITY CAMERA. THE NUMBER PLATE CAN BE EASILY READ DESPITE THE SMALL PORTION OF THE IMAGE IT OCCUPIES.**

**THIS IMAGE WAS RECORDED IN TOTAL DARKNESS USING THE SAME CAMERA WHICH HAS INTEGRAL INFRA RED LED ILLUMINATION**

**The Vista Quantum 960H** recorder pictured was used to produce these images in conjunction with a good quality 700TVL HD960H compatible analogue camera.
