

## D1 Digital Video Recorder

**XDR5D Series full size Digital Video Recorders provide REAL TIME continuous High Resolution Recordings to D1 with the facility to copy any incidents to a DVD as required for evidence purposes. They have the capacity to record for the designated period of time without sacrificing recorded picture quality.**

### XDR5D Series DVRs:

Available in 4, 8 or 16 channel options with a choice of HDD capacity, these powerful DVRs provide real time recording per camera at CIF (XDR5C) or D1 (XDR5D) resolutions. They provide control of PTZ cameras and dome systems via integrated RS485, whilst the extensive programming options mean they are also suited for the more demanding applications. Control is simple, whether direct from the user friendly front panel, client software or mobile applications.

- Real time D1 recorders
- Scalable CIF/2CIF/4CIF resolution
